

USD 220 Social Emotional Measurement Tool Fastbridge mySAEBRS

To get a full picture of the overall success of our students, we measure students' social-emotional wellbeing throughout the year at the same time we check in on their reading and math performance. The students themselves complete a short, 20 question assessment through Fastbridge called "mySAEBRS".

The mySAEBRS is designed for universal screening of students in grades 2 through 12. Students in kindergarten and grade 1 have not reached the developmental stage required to accurately think about and rate their own behaviors. For this reason, the mySAEBRS is not available for use by students in kindergarten and grade 1.

Administration. It is estimated that it takes approximately 5-10 minutes for a student to complete the mySAEBRS English. Multiple students (i.e., an entire class) can complete the mySAEBRS at the same time in a computer lab or the classroom. And, in cases where some students will use the Spanish version and others the English, all the students can take the assessment at the same time. Each student takes the assessment 3 times each year (fall, winter, and spring) on a computer or tablet device with connected headphones.

EXAMPLE:

The screenshot shows the mySAEBRS assessment interface. At the top, it says "mySAEBRS" and "1 of 20". Below this, the statement "I argue with others." is displayed. At the bottom, there are four response options: "Never", "Sometimes", "Often", and "Almost Always". Each option is represented by a button with a circular icon: "Never" has a white circle, "Sometimes" has a circle with three blue dots, "Often" has a circle with many blue dots, and "Almost Always" has a solid blue circle. The buttons are highlighted with a red border.

Interpretation of mySAEBRS English results is what helps to guide identification of at-risk students, as well as instruction and intervention development.
